

WHAT'S NEW?

SHOCKWAVE THERAPY

Shockwave Technology Theory works by a deep penetrating acoustic focused (ESWT) wave that activates previously inactive cells, driving the formation of new cells that replace damaged tissues. Shockwave therapy accelerates blood flow to the specific area and may induce vasodilation and angiogenesis, restoring and improving musculoskeletal tissue.

Most treatments are protocol based and can be done in a matter of minutes by a doctor or assistant from the 7" color touch screen.

Professional Version

With 1 Treatment Head \$6395 plus tax

With 2 Treatment Heads \$7290 plus tax
